- (3) Standard drawings of the following fabrication details shall be submitted:
- (i) Welding details for piping connections.

(ii) Welding details for nonstandard fittings (when appropriate).

- (d-1) Plans of piping for industrial systems on mobile offshore drilling units must be submitted under subpart 58.60 of this subchapter.
- (e) Where piping passes through watertight bulkheads and/or fire boundaries, plans of typical details of piping penetrations shall be submitted.
- (f) Arrangement drawings specified in paragraph (c)(2) of this section are not required if—
- (i) The location of each component for which there is a location requirement (i.e., shell penetration, fire station, foam monitor, etc.) is indicated on the piping diagram;
- (2) The diagram includes, or is accompanied by and makes reference to, a material schedule which describes components in sufficient detail to substantiate their compliance with the regulations of this subchapter;

- (3) A thermal stress analysis is not required; and
- (4) A dynamic analysis is neither required nor elected in lieu of allowable stress reduction.

## Subpart 56.04—Piping Classification

## § 56.04-1 Scope.

Piping shall be classified as shown in Table 56.04-1.
